H. Res. 69

The National DIPG Awareness Resolution

diffuse intrinsic pontine glioma, a pediatric brain cancer
An Ambassador for Childhood Brain Cancer Awareness

We are asking our Representatives in Congress for help with a pervasive national problem of unabated suffering and death for which public awareness is urgent. The afflicted are too devastated to speak out, and almost all victims of DIPG pass away very young. The bereaved community is saddled with the responsibility of raising money for research where our system has utterly failed these children.

Now we Parents are asking our Members and Leaders in the US House of Representatives for help.

DIPG is responsible for the majority of brain tumor deaths each year in children, and exemplifies in a powerful way the marginalization and suffering so many children with cancer and their families face every day.

Sadly, DIPG parents must be resigned to witnessing the death of their children in complete helplessness, not knowing exactly when, how, or ultimately why, they will die. They discover there are no solutions for them because, "the numbers aren't great enough for investors," in one of the wealthiest countries in the world.

DIPG is responsible for the majority of pediatric brain tumor deaths annually;
brain cancer is the #1 disease-related cause of death in children in the United States.

DIPG and pediatric cancer is an unrelenting killer of our children.

*There is a strong movement across the USA with **31 State Proclamations in 2018 for a DIPG Awareness Day on May 17**, and for greater consideration for children with cancer as written in H. Res. 69.*

We beg of you to please consider the information included herein of our request for a House Vote on H.Res.69 before the end of this Session of Congress

Roughly 1200 more children have died of DIPG since its first introduction in 2016.

"It's a hard pill to swallow; even after 50+ years of clinical knowledge, there are no solutions for your child because his or her life, for all practical purposes, doesn't matter."

Thank you for your consideration.

DIPG ADVOCACY GROUP

Every child is a life, not a number

So that one day, no parent must hear there are no solutions for their child because, "the numbers aren't great enough for investors..."

DIPG ADVOCACY GROUP

Concerned Citizens across the United States and around the World

Support for awareness and research for diffuse intrinsic pontine glioma, a pediatric brain cancer

www.HRes69.org

to the Honorable Members of the United States House of Representatives, and Staff:

H.Res.69 represents a movement, born of intense grief, for greater national awareness of the lack of research funding for DIPG, deadly pediatric disease, and of the resulting human suffering which continues with no end in sight. The commonly heard excuse is that only a small population is affected in any given year. *Their lives matter.* Cancer kills more children than any other disease each year in the USA, as you may know. Unfortunately, we must fight tooth and nail for scarce recognition of this fact in one of the wealthiest countries in the world which boasts the most advanced technologies.

The DIPG Awareness Resolution was authored by Congressman Steve Knight (R-CA-25) in the hopeful spirit of national awareness, acknowledgement and conversation regarding more timely solutions for children with cancer, specifically DIPG, *who invariably face certain death.* The median survival time, with treatment, is 9 months. An Awareness Day will help families raise funds for research, a burden which parent-led foundations have carried virtually alone and have effectively supported some of the most pioneering and valuable research in neuroscience and oncology.

H.Res.69 simply asks that years of life lost and the mortality rate for any given type of cancer receive greater consideration for research grants both with public and private funding, and brings attention to the tens of thousands of children who have bravely walked toward their death without enough of a fight from us. The standard treatment protocol of radiation and palliative care are the same today for DIPG as when Neil Armstrong's daughter died of it in 1962. Clearly greater awareness to this relentless human suffering is needed.

You are our greatest hope for change! Greater national awareness for this issue will also help continuing efforts to fund the *Childhood Cancer STAR Act*, the *Gabriella Miller Kids First Research Act*, and other important legislation for pediatric cancer. The failure to procure allocations for previous legislation, such as the *Caroline Pryce Walker Conquer Childhood Cancer Act of 2008*, and its reauthorization in 2013, is still strong in the minds of many advocates, who are working hard, as I write, to raise national support for this hurdle of allocations for STAR. Time is not a luxury these children can afford.

Support for a DIPG Awareness Day across the United States is significant. In 2018, 31 States had DIPG Awareness Proclamations, and Awareness Day May 17, demonstrating an undeniable national desire for support; Protocol 7 of Rule 28 of the 114th Congress House Republican Conference clearly supports the legitimacy of a House Vote in this case.

Please support this avenue in our democracy for the People to petition their Representatives in Congress for help.

Please co-sponsor and support a House Vote for H. Res. 69! The text is brief and to the point for your consideration; for further inquiry, the staff members listed below would be happy to accommodate you. On behalf of our national community, we thank you with all of our hearts, and our host of angels thanks you.

Very Truly Yours,

Janet Demeter

115TH CONGRESS

1ST SESSION H. RES. 69

“Expressing support for designation of the 17th day in May as “DIPG Awareness Day” to raise awareness and encourage the research into cures for diffuse intrinsic pontine glioma (DIPG) and pediatric cancers in general.”

IN THE HOUSE OF REPRESENTATIVES

JANUARY 30, 2017

Mr. KNIGHT (for himself, Ms. SPEIER, Ms. ESHOO, Mr. MCCAUL, Mr. CARDENAS, Mr. MURPHY of Pennsylvania, Mrs. COMSTOCK, Mrs. DINGELL, Mr. DELANEY, Ms. BROWNLEY of California, and Mr. SOTO) submitted the following resolution; which was referred to the Committee on Energy and Commerce

RESOLUTION

Expressing support for designation of the 17th day in May as “DIPG Awareness Day” to raise awareness and encourage the research into cures for diffuse intrinsic pontine glioma (DIPG) and pediatric cancers in general.

Whereas diffuse intrinsic pontine glioma (DIPG) affects 200 to 400 children in the United States each year with certain regularity;

Whereas brain tumors are the leading cause of cancer-related death in children;

Whereas DIPG is the second most common malignant brain tumor of childhood;

Whereas DIPG is the leading cause of childhood death due to brain tumors;

Whereas the median survival-time is only 9 months post diagnosis with treatment;

Whereas 5-year survival is less than 1 percent;

Whereas given the age at diagnosis and the average life expectancy, the number of life years lost annually because of DIPG is approximately 25,000 years of person life lost (calculated as the number of children diagnosed by average of male and female life expectancy from that median age, $300 \times 80 = 25,000$ years of person life lost annually);

Whereas prognosis has not improved for children with DIPG in over 40 years; and

*Whereas government funding for research for pediatric cancer is not commensurate with the level of unmet medical need for this vulnerable population: Now, therefore, be it

Resolved, That the House of Representatives—

(1) supports the designation of “DIPG Awareness Day”;

(2) encourages all people of the United States to become more informed about diffuse intrinsic pontine glioma (DIPG) pediatric brain cancer, and the current challenges to the medical research system in designating sufficient research funding for pediatric cancers;

(3) supports expanded research to better understand DIPG, develop effective treatments, and provide comprehensive care for children with DIPG and their families; and

*(4) And encourages public and private sources of research funding to elevate their consideration of the mortality rate of a type of cancer as well as the life-years lost as significant factors to be considered during the grant application process.

**These lines have been edited slightly from the original for the approval of the Energy and Commerce Committee and those parties concerned with pediatric brain cancer research.*

2018: 31 STATES AND COUNTING

May 17th, DIPG Awareness Day

Governors in the States of Alabama, Arkansas, Arizona, Florida, Georgia, Hawaii, Idaho*, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Mississippi, Missouri, Nebraska, Nevada, New Jersey, Ohio, North Carolina, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas*, Virginia, Washington, and Wisconsin issued Proclamations establishing DIPG Awareness Day as May 17, 2017. In California, Mississippi, Nebraska, and Rhode Island, DIPG Awareness Day was established **through the legislature. Four additional states still have requests under consideration. California was the first state to have an Awareness Resolution in 2014.**

**These states have a permanent May 17th DIPG Awareness Day and do not have to renew in 2019.*

Cosponsors in the House of Representatives
