

CRACK FILLER

BROWN CRACK FILLER

for exposed pea gravel concrete

GRAY CRACK FILLER

for exposed chipped limestone concrete

PLAIN CRACK FILLER

for broom swept concrete

DESCRIPTION

EAGLE CRACK FILLER cosmetically repairs scars, gouges and cracks in outdoor concrete surfaces. This crack filler will match the texture, color and appearance of specific concrete surfaces. Using this product and appropriate EAGLE CONCRETE SEALER makes the crack virtually disappear, although the sand in the EAGLE CRACK FILLER may not be an exact match to the sand in concrete. EAGLE CRACK FILLER must be sealed for maximum blending and longevity. For a more structural repair, fill crack with epoxy or exterior caulk before topping with EAGLE CRACK FILLER. 1 quart will fill approximately 100 ft. of normal cracks depending upon depth and width of crack.

APPLICATION

1. Clean concrete well with a power washer.
2. SHAKE WELL!
3. Remove cap and snip spout to desired width of pour.
4. Pour EAGLE CRACK FILLER into crack. Concrete can be damp but crack should be sufficiently dry so there is no standing water in the crack.
5. Allow EAGLE CRACK FILLER to dry for 4 hours before sealing.
6. Seal with appropriate EAGLE CONCRETE SEALER for your surface.

PRECAUTION

Protect from freezing. Apply when air and surface temperature is above 50° F and below 90° F. Do not apply when rain is expected within 4 hours. Discard after use. Opened bottle will not store well.
