PHASE MONITORS

Part numbers: 001-230-118, 001-230-1212, 001-480-118, 001-480-1212, 001-DVM-118, 001-DVM-1212, 002-230-123, and 002-480-123 are Three Phase Monitors used for Motor Protection. These Phase Monitors come in 230V, 480V, or as a Dual Voltage Phase Monitor.

When proper voltage is connected to the Phase Monitor, the internal relay of the Phase Monitor Relay will be energized and the LED will come on steady. An abnormal condition in the Phase Failure Relay will cause the LED to blink during the trip

<u>Item #</u>	<u>Item Name</u>	<u>Operating Voltage (AC)</u>	<u>Relay Type</u>	<u>Base Terminal Configuration</u>
<u>001-230-118</u>	3 Phase, Medium Case, Phase Monitor	230 V	SPDT	8 Pin, Octal
<u>001-480-118</u>	3 Phase, Medium Case, Phase Monitor	480 V	SPDT	8 Pin, Octal

<u>Item #</u>	<u>Item Name</u>	<u>Operating Voltage (AC)</u>	<u>Relay Type</u>	<u>Base Terminal Configuration</u>
<u>001-230-1212</u>	3 Phase, Medium Case, Phase Monitor	230 V	DPDT	Plug in 12 Pin Rectangular
<u>001-480-1212</u>	3 Phase, Medium Case, Phase Monitor	480 V	DPDT	Plug in 12 Pin Rectangular
<u>002-230-123</u>	3 Phase, Large Case, Phase Monitor	230 V	DPDT	Surface Mount with Pressure Clamp Screw Terminals
<u>002-480-123</u>	3 Phase, Large Case, Phase Monitor	480 V	DPDT	Surface Mount with Pressure Clamp Screw Terminals
<u>001-DVM-118</u>	3 Phase, Medium Case	230 V 480 V	SPDT SPST	8 Pin, Octal
<u>001-DVM-1212</u>	3 Phase, Dual Voltage Phase Monitor	230 V 480 V	DPDT	Plug in 12 Pin Rectangular
