

Mazda CX-7 2007-2009

PART NUMBER: MV-50-03-G3

PLEASE READ COMPLETE INSTRUCTIONS BEFORE INSTALLING THIS VSM G3

All instructions assume a drivers seat vantage point. Caution is advised when removing and reassembling wood or plastic parts of a dash. Applying unnecessary force or pressure may cause a piece to crack or break.

**When properly installed, the metal between the ball and 2 small holes is all that is exposed.
(Some exceptions apply).**

TOOLS REQUIRED: 5/64" drill bit and drill, marking pen

PARTS INCLUDED: VSM G3, A Plate, J Stem, two (2) #8 x 1/2" screws, Phillips screwdriver

LOCATION: Right of Radio

STEP 1. Open glove box and place the VSM G3 flush to the left glove box wall, as pictured in Photo #2. Be sure to attempt to place the VSM G3 in the exact location as pictured and that the VSM G3 ball provides plenty of clearance for the glove box to open.

Note: Only the top small hole located closest to the ball should be visible when the VSM G3 is in place and the glove box door is closed.

Tip: Tape the mount in place before step 2.

STEP 2. When the VSM G3 is in position, mark the pilot holes with a marking pen. Use a 5/64" drill bit and drill out the marked locations. Only drill deep enough to open up a pilot hole, approximately 1/4 of an inch.

STEP 3. Place the VSM G3 over the pilot holes and secure the mount to the dash molding using the two provided #8 x 1/2" screws and Phillips screwdriver. Once the VSM G3 has been secured and is in place, close the glove box. You have successfully installed your VSM G3!

Note: See the Assembly Instructions for G3 Components for additional information.
