

Subaru Forester (2003-2006)

PART NUMBER: SU-70-03-L

PLEASE READ COMPLETE INSTRUCTIONS BEFORE INSTALLING THIS Pro.Fit Legend.

All instructions assume a drivers seat vantage point. Caution is advised when removing and reassembling wood or plastic parts of a dash. Applying unnecessary force or pressure may cause a piece to crack or break.

TOOLS REQUIRED: Dash Trim Removal Tool (DM-40-22), # 2 Phillips screwdriver, 5/64" drill bit and drill, protective cloth

PARTS INCLUDED: Pro.Fit Legend, instructions, two (2) # 8 x 1/2" screws

LOCATION: Right of radio

STEP 1. Insert dash trim removal tool behind lower-right corner of the gear shift bezel. Pry downward to release a retainer clip. Work the tool clockwise around the bezel until all clips are released. Lift bezel over gear shift and set aside.

STEP 2. Next, the bezel that surrounds the air vent, radio and climate control knobs needs to be removed. Remove the two (2) Phillips screws that hold the bezel bottom in place; directly below the climate control. Pull bezel bottom outward with your hands, working upward until the bezel is released. Disconnect hazard switch and climate control cables and set bezel aside.

STEP 3. Remove four (4) radio mounting screws, one from each corner. Slide radio out of its cavity, wrap in protective cloth and let hang down. **Do not** disconnect any wiring from radio.

STEP 4. Align Legend top with bottom of bezel clip hole. **Photos 1 & 2.** Slide Legend upwards and out from the dash enough so it does not interfere with the glove box door. Using the Legend as a guide, mark the location of two (2) screw holes. Set Legend aside. Drill two (2) pilot holes at the marked location using a 5/64" drill bit and drill. Align the Legend over the pilot holes, insert two (2) # 8 x 1/2" screws and tighten.

STEP 5. Re-assemble the dash in reverse order, remembering to reconnect wiring harnesses. This completes the installation of your Legend.
