

THIMBLES!

There are conflicting reports of the first thimble—the Han Dynasty? Roman sites?—but they were in wide use by the 14th century.

Thimbles protect your fingers and help you push the needle.

What thimble you choose depends on the task at hand and your personal preference (feel and fit).

It can take practice to feel comfortable sewing with a thimble, so give it some time.

There are lots of models to choose from, so look for the one that feels comfortable and meets your needs.
