

Mad Scientist

Lemon Juice and heat

	What you will need	
A	Lemon or lemon juice	
B	Small Cup	
C	Q tip	
D	light	
E	White Paper	

Lemon juice is **acidic** and weakens paper. When paper is heated, the remaining acid turns the writing brown before discoloring the paper.

Instructions		
1	Pour or squeeze some lemon juice into the small cup	
2	Dip your cotton swab in the lemon juice	
3	Draw a picture or write a message with the lemon juice on the white paper	
4	Let it dry	

Watch what happens

It disappears!

5	Hold your paper up to the sun or to a light bulb	
---	--	---

Now be a mad scientist and try it again and again!
