

## **ContinUse Biometrics raises \$20 million in Series B funding**

**The company is revolutionizing consumer health with its effortless & non-touch bio-sensing technology for preventive medical care.**

Tel Aviv, Israel (March 8th, 2018) – ContinUse Biometrics announced today that the company has successfully raised \$20M in Series B funding round, bringing total investment to date to \$27M. The round was led by the Chartered Group.

ContinUse Biometrics partners with leaders in healthcare, automotive and data analytics to bring to the market a revolutionary preventive care solution which enables users to detect deterioration in their medical conditions early on and take immediate action.

ContinUse's ground-breaking technology requires no physical contact with the user. It can simultaneously monitor 20+ bio-medical parameters remotely, including vital signs (as well as blood pressure and cardiographs), auscultation of heart and lung sounds, muscle activity and even biochemical screens. ContinUse applies advanced AI techniques to analyze the collected data in its health cloud, providing unique and actionable insights for end users, whether patients or physicians – in fields such as cardiac, vascular, neurology, pulmonary diseases and diabetes. Its offering can even be used for enhancing road safety by tracking competence and alertness of the driver.

"We're happy to welcome Chartered Group on our board. I'm sure Chartered Group will help us expand our business network and accelerate our collaboration with partners in Asia & Europe", said Asher Polani, CEO of ContinUse Biometrics. Eyal Agmoni, of Chartered Group, said that "the decision to invest in ContinUse resulted from deep belief in its game changing technology and the potential to introduce the company to future partners in the Japanese & Asian markets".

### **About ContinUse Biometrics Ltd.**

Founded in 2015 by Asher Polani, Prof. Zeev Zalevsky, Dr. Yevgeny Beiderman, Prof. Javier Garcia and Amit Klir, the company was born from a decade long academic collaboration between Bar-Ilan University and the University of Valencia. It is backed by prominent investors including Olive Tree Ventures, Lenovo Group, Johnson Controls/Tyco and the Chartered Group.
