

We would like to introduce you our new website www.m2bswitches.com

Taking profit of the new general brochure we presented last January, we have worked in an easier website where our customers can find all technical information related to our products. Our new website is aimed to offer the same new aesthetic line.

It is not just a new look. We have also worked in a really dynamic and interactive website which is, by itself, a perfect tool for all technical and engineering departments which require a quick access to all the information, for example, you can get to all products through a pull-down menu or through a direct menu on homepage.

Another important improvement you can see is that all products have their PDF file where you can check all technical possibilities we can offer you.

We would like to invite you to visit us on internet and remind you that our sales department is at your disposal for more information. You can contact us through your agent or writing us to info@m2bswitches.com or if you prefer calling us at (0034) 93 867 51 93.
