## Now, The RL-23 in two-colour push button.

Dear Mr/Mss: Mss. Anna Bonet

We would like to present the new version of the RL-23. Internally speaking it is basically the known version but with two-colour push button made with two different parts,

The main advantages are:

1. It makes the same function than an illuminated cap.
2. Cost is cheaper than a lighted version.
3. It has an easier operation without a bulb and a better quality performance.

We invite you to contact with your agent in M2B at [info@m2bswitches.com](mailto:info@m2bswitches.com) or all us at (0034) 93 867 51 93 to know more details about this new design.

You can also visit us in [www.m2bswitches.com](http://www.m2bswitches.com)

We would like to remember that we are always at your service to help you to find the best solution for your projects.

### **General characteristics**

*-10 different functions*

*-More than 4 different colours, green, red, orange, blue and others.*

*-Customized cap printing*

*-6 different terminals*

*-With 16(8)A available*

*-Up to 125°C of working temperature*
