

Why Financially Prepare For BREASTFEEDING

LESS STRESS

Transitioning back to a job can be quite stressful - which decreases milk supply.

SKIN-TO-SKIN

Our bodies depend on seeing, smelling, hearing & feeling our baby for milk letdown. Breast pumps are not as efficient as a child attaching to the breast.

CONTINUE NIGHT NURSING

Night nursing is an essential part of baby's development - but a difficult lifestyle for mothers with outside jobs.

SELF-WEAN

A stable stream of income better allows for the self-weaning process.

FINANCIAL SECURITY

When we feel confident in our finances we are able to focus on more important things, like pouring love into our child.
