

The Power Of Our BREASTS while breastfeeding

Endless Supply

Breasts automatically refill. When one empties, baby can move to the other breast.

Tactile Learning

Breasts are perfect for little ones who love touch & textures.

Kiss Distance Away

Breasts are a perfect distance from our face, so that we can kiss our little ones while they nurse.

Accessible

There are not many things our little ones can easily access. When cuddled on our laps, breasts are in reach.

Easy Grip

Breasts fit perfectly in our little one's hands - making them easy to hold and pump.

Perfectly Positioned

Breasts are in front of us - so that we can admire our children as they nurse.

Non-Verbal Communication Tool

Whether our child is fussy, sick or just needs a boost - our breasts know and are able to respond to our child's every need.

...so much more than milk
