Advanced Search helps you find programs based on many different factors, including cost, transportation, age, etc.

Browse will let you narrow a list of programs based on age groups, program types, and zip codes. This is best for those that are not sure what they are looking for.

Review a Program allows you to rate and review your experience at a particular site.

Go ahead and click on the **Advanced Search** button. This is the best way to find a program if you have an idea of what you are looking for. You can be as specific or as general as you like.

If you know of a program title or a specific location that you would like to search, enter that information here. If not, simply leave this section blank.

One of the best ways to search is by Program Type. These include Academics, Sports & Recreation, College Readiness and many more. Each Category also has sub-categories to help you narrow down your results. Feel free to choose a sub-category or leave it blank.

In the Miscellaneous search area you can narrow your results by cost, gender requirements, languages, disabilities, age, and religious affiliation. As for the other sections, you can fill in as many or as few as you like. The more data you enter, the better your results will be.

Are you only looking for weekend programs? What about before school vs. after school? This is the place to enter that info.

Lastly, you can find programs that offer transportation or are at least near trains and buses.
