

mPass

The mPass simply times, counts and manages all your students' hallway passes - all from the convenience of one APP.

Once downloaded, you and your students can step back while the mPass handles all your hallway passes.

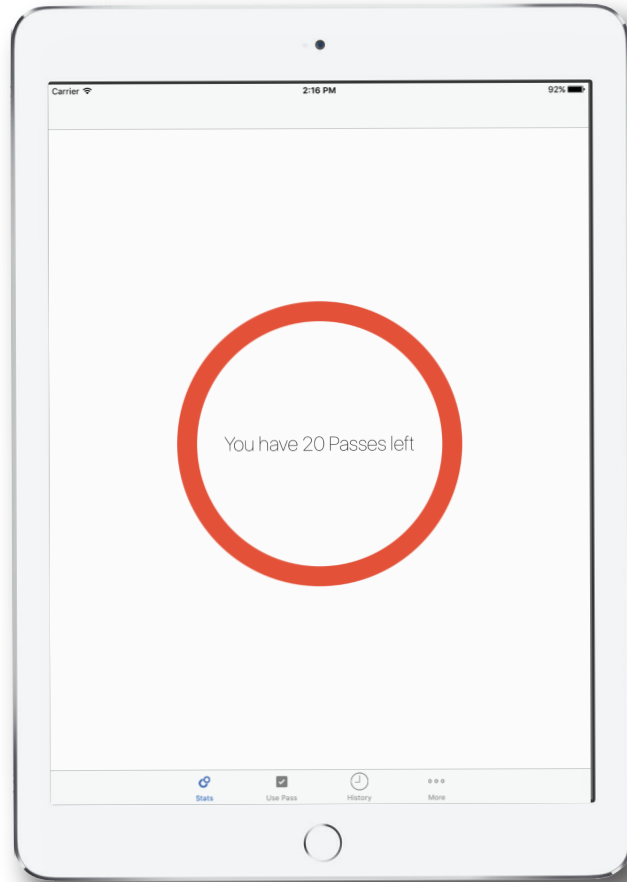

What makes the mPass interesting is that this is an app designed by a student that aptly solves issues involved in managing everyday hall passes, typical in classroom settings.

Be it going to the locker, bathroom, principal's office and other student trips outside the classroom, the mPass will notify you, time the student and count the passes!

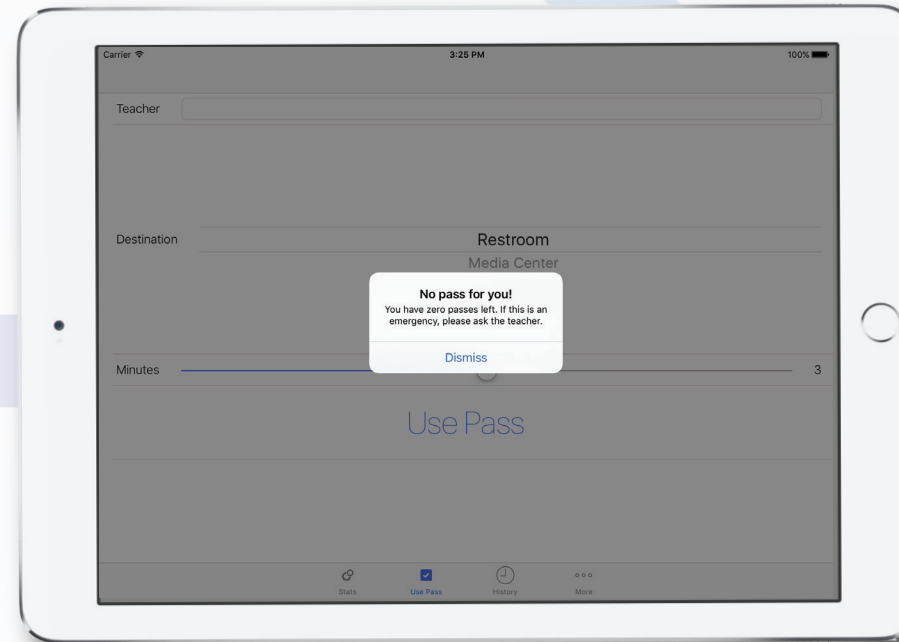

The simplest, smartest hallway pass for your class.

Your digital monitor. No more student excuses.

The mPass stores information of a student's hallway pass usage. The number of passes allocated for a student in a year can be configured prior to install.

Every time a student uses a pass, the mPass notifies the student how many passes are left. Once they have all been used up, a student can no longer avail of any passes.

It has a simple, easy to use interface that has been designed smartly, simply and with real time student-teacher needs in mind.

The mPass and its hosts of potentials.

The mPass can also be customized to fit your other school needs. It can also be configured for library book passes, student sport activities, special event passes and more!*

Currently, the mPass is now being used at the Minnetonka School District (Middle School East). Your school can benefit from this too! Try the mPass. Learn more. Schedule a demo.
