Materials

- Merino wool tops (or roving), 18 – 19 micron 600g (21 oz.)
200 g (7 oz.) total of three or more additional colors of your choice
- Wool locks, about 150 g (5.3 oz. of Gotland, Teeswater or any other kind of locks), in colors of your wool
- Silk hankies, 3-5, preferably dark colors
- Soft plant fiber. (this fiber is made from plants, processed into roving, and dyed. (Ramie, Bamboo, viscose, or Tencel), about 2 meters (6 feet) of roving
Please chose the color suitable to your palette but contrasting to the main wool color. It's easier to control the thickness and quality of layout if you can see the fibers on the surface.
- Silk loose-weave fabric, 2 -3 momme, 3-4 meters/yards if the width is about 1 meter;
I prefer and enjoy working with the thinned silk gauze (Margilan) from Uzbekistan. This silk is very soft, shiny and lightweight, great felting and easily manipulated into gorgeous surface effects. You can substitute this fabric with other loose-weave and very thin silk gauze
- Small scraps of different colors silk chiffon (or any other loose-weave natural fabric)
- Two medium size buttons
