**BEST POSITION FOR THE DUPLICATION**

5 cm

IT IS RECOMMENDED:

TO REALIZE A CORRECT DUPLICATION OF THE REMOTE CONTROLS, WE RECOMMEND TO FOLLOW THE PROCEDURES HERE BELOW TAKING CARE TO DISTANCE YOURSELF BY TOOL THAT CAN GENERATE FREQUENCY TROUBLES AS:

CORDLESS
WI-FI VIDEO SURVEILLANCE DEVICES
MOBILE PHONES, SMARTPHONES OR TABLETS
WI-FI OR BLUETOOTH ACTIVED IN YOUR COMPUTERS
ELECTRONIC MOTOR
NEON LIGHTS
WIRLESS DEVICES FOR BACK END MANAGEMENT IN THE BUSINESS STORES

1. While pressing button 1 of the "WHY EVO", at the same time press button 2 four times.
2. Release both buttons. Now the "WHY EVO" WHITE LED emits a short flash every 2 seconds.
3. Place the original remote control to be programmed in front of the "WHY EVO", at about 5 cm of distance (as shown in the picture).
4. Press and keep pressed the button of the original remote control and wait for the "WHY EVO" WHITE LED to flash faster, followed by a change of its colour (to BLUE) that confirms the correct learning of code. This step may take a few seconds and during that the LED colour is WHITE.
5. While the BLUE LED is flashing, press the button of the "WHY EVO" where you want to program the code just learnt, and keep pressed until the LED switches off and an extended BEEP is emitted for a reconfirmation of the correct code learning. This step may take a fewseconds.
6. The copy has been successful. Now test the WHY EVO to ensure it is functioning correctly.

Notes:

• If the WHITE LED flashes only 3 times (of WHITE color) and switches off, the code has not learnt correctly. Please repeat the operation from the step 1.

• The WHY EVO memory is completely re-writable.

• To duplicate further buttons of WHY EVO, please repeat the operation from the step 1.

1. While pressing button 1 of the "WHY EVO", at the same time press button 2 four times.
2. Release both buttons. Now the "WHY EVO" WHITE LED will emit a short flash every 2 seconds.
3. Place the original remote control to be programmed in front of the "WHY EVO", at about 5 cm of distance (as shown in the picture).
4. Press and keep pressed the button of the original remote control and wait for the "WHY EVO" WHITE LED to flash faster, followed by a change of its color (to BLUE) that confirms the correct learning of code. This step may take a few seconds and during that the LED colour is WHITE.
5. While the BLUE LED is flashing, press the button of the "WHY EVO" where you want to program the code just learnt, and keep pressed until the LED switches off. The WHY EVO remote control will emit an extended BEEP for a reconfirmation of the correct code learning.
6. The copy has been successful.
7. Now activate the correct procedure for the programmed model and insert the new remote control on the receiver (see the compatibility list present in this manual).

Notes:
• If the WHITE LED flashes only 3 times (of WHITE color) and switches off, the code has not learnt correctly. Please repeat the operation from the step 1.
• The WHY EVO memory is completely re-writable.
• To duplicate further buttons of WHY EVO, please repeat the operation from the step 1.

To activate the remote control on the receiver for models marked with (D.O.R.) proceed as below:
1. First of all you must be closed to the automation.
2. Press and keep pressed the programmed button for 10 seconds, when the LED starts to flash, release the button.
3. Wait until the LED turns off. The operation has been completed, now you can use your new remote.

To activate on the receiver of all the other models: Refer to the instructions of the original model.

NOTE: THE SEED CODE OF THE WHY EVO CAN BE EMITTED AS HERE BELOW:
1. Press the buttons 1 and 2 simultaneously for 8 seconds and release them when the LED start to flash;
2. While the LED is flashing press the button with the seed code needed.

ATTENTION!! Every kind of receiver can have the "radio-mode" disarmed. In this cases will be necessary insert the new remotes controls with the "manual procedures".

BFT D.O.R.

1. While pressing the button 1 of the "WHY EVO", at the same time press button 2 four times.
2. Release both buttons. Now the "WHY EVO" WHITE LED will emit a short flash every 2 seconds.
3. Place the original remote control to be programmed in front of the "WHY EVO", at about 5 cm of distance (as shown in the picture).
4. Press and keep pressed the button to be programmed of the original remote control, till the WHITE LED will switch on as a solid light; now release the button.
5. The "WHY EVO" WHITE LED will emit a short flash every 2 seconds supported by two following BEEPs. These two alerts inform the user that, to duplicate the remote control, it is necessary to emit the SEED CODE to complete the copy.
6. Transmit now the SEED CODE of the BFT original remote control, using a pin, press the rear hide button or, according to the new references, press the 1 and 2 buttons until the original remote control LED switches on.
7. Now the "WHY EVO" WHITE LED flashes faster and then changes colour (to BLUE), for a reconfirmation of the correct code learning. This step may take a few seconds.
8. At this moment, press the "WHY EVO" button when you want to store the code and keep pressed until the WHY EVO BLUE LED switches off and an extended BEEP is emitted for a reconfirmation of the correct code learning.
9. Activate now the D.O.R. procedure to insert the new remote control on the receiver.

V2 D.O.R.
433 - 868

1. While pressing the button 1 of the "WHY EVO", at the same time press button 2 four times.
2. Release both buttons. Now the "WHY EVO" WHITE LED will emit a short flash every 2 seconds.
3. Place the original remote control to be programmed in front of the "WHY EVO", at about 5 cm of distance (as shown in the picture).
4. Press and keep pressed the button to be programmed of the original remote control, until the WHITE LED switches on as a solid light; now release the button.
5. The "WHY EVO" WHITE LED will emit a short flash every 2 seconds supported by two following BEEP's. These two alerts inform the user that, to duplicate the remote control, it is necessary to emit the SEED CODE to realize the copy.
6. Transmit now the SEED CODE of the V2 original remote control pressing at the same time 1 and 2 buttons.
7. Now the "WHY EVO" WHITE LED flashes faster and then changes colour (to BLUE), for a reconfirmation of the correct code learning. This step may take some seconds.
8. At this moment, press the "WHY EVO" button when you want to store the code and retain pressed until the "WHY EVO" BLUE LED switches off and an extended BEEP is emitted for a reconfirmation of the correct code learning.
9. Activate now the D.O.R. procedure to insert the new remote control on the receiver.

To activate the remote control on the receiver for models marked with D.O.R. proceed as below:
1. First of all you must be closed to the automation.
2. Press and keep pressed the programmed button for 10 seconds, when the LED start to flash, release the button.
3. Wait until the LED turns off. The operation has been completed, now you can use your new remote.

To activate on the receiver of all the other models: Refer to the instructions of the original model.

NOTE: THE SEED CODE OF THE WHY EVO CAN BE EMITTED AS HERE BELOW:
1. Press the buttons 1 and 2 simultaneously for 8 seconds and release them when the LED start to flash;
2. While the LED is flashing press the button with the seed code needed.

ATTENTION!! Every kind of receiver can have the "radio-mode" disarmed. In this cases will be necessary insert the new remotes controls with the "manual procedures".
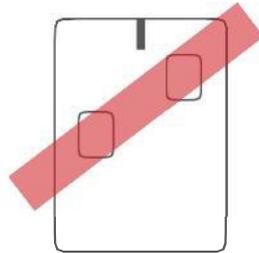

FAAC
433 - 868

GENIUS
433 - 868

Attention: verify the programming remote control is a MASTER.
Pressing whatever button, the LED has to emit a double flash rather than to switch on as a fixed light.

1. While pressing the button 1 of the "WHY EVO", at the same time press button 2 four times.
2. Release both buttons. Now the WHY EVO WHITE LED will emit a short flash every 2 seconds.
3. Place the original remote control to be programmed in front of the "WHY EVO", at about 5 cm of distance.
4. Press and keep pressed the button to be programmed of the original remote control, until the WHITE LED switches on as a solid light; now release the button.
5. The WHY EVO WHITE LED will emit a short flash every 2 seconds supported by two following BEEP's. These two alerts inform the user that, to duplicate the remote control, it is necessary to emit the SEED CODE to complete the copy.
6. Predispose the FAAC/GENIUS remote control for the SEED CODE emission. Press simultaneously buttons 1 and 2 (note: THESE ARE THE BUTTONS OF THE DIAGONAL LINE as in the picture).

7. While FAAC/GENIUS remote control LED flashes, place it in front of "WHY EVO" at a distance of 5cm and press the button to be programmed until the "WHY EVO" WHITE LED flashes faster and then changes colour (to BLUE), for a reconfirmation of the correct code learning. This step may take some seconds.
8. At this moment, press the button when you want to store the code and keep it pressed until the "WHY EVO" BLUE LED switches off and an extended "BEEP" is emitted to confirm the correct learning of the code.
9. The copy has been successfully completed. Now check on the automation the correct functioning of new WHY EVO remote control pressing twice the copied button.
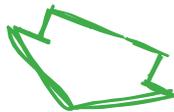

Notes:
• If the WHITE LED flashes only 3 times (of WHITE color) and switches off, the code has not learnt correctly. Please repeat the operation from the step 1.
• The WHY EVO memory is completely re-writable.
• To duplicate further buttons of WHY EVO, please repeat the operation from the step 1.

1. While pressing the button 1 of the "NEW WHY EVO", at the same time press button 2 four times.
2. Release both buttons. Now the WHITE LED of "NEW WHY EVO" will emit a short flash every 2 seconds.
3. Place the "SOURCE WHY EVO" in front of the "NEW WHY EVO", at about 5 cm of distance (as in the picture 3 at the page 3).
4. Press and keep pressed the button to be programmed of the "SOURCE WHY EVO"

NOW IF THE CODE IN THE "SOURCE WHY EVO"

IS A FIXED OR ROLLING-SIMPLE CODE

5a wait for a change of flash (as a faster flash) of "NEW WHY EVO" WHITE LED and a change of its color (BLUE) that confirms the correct learning of code. This operation may take a few seconds.

6a While the BLUE LED is flashing, press the button of the "NEW WHY EVO" where you want to program the code just learnt, and keep pressed until the LED switches off and an extended BEEP sound is emitted for a reconfirmation of the correct code learning.

7a The copy has been happened with success. Now check the functionality of the NEW WHY EVO remote control by pressing the button where the code has been programmed. If it doesn't work, please proceed with the insertion on the receiver of the NEW WHY EVO, through the D.O.R. function, if it is present, or through the procedures given by the automation manufacturer.

IS A ROLLING-COMPLEX CODE

5b The WHY EVO WHITE LED will emit a short flash every 2 seconds supported by two following BEEP sounds. These two alerts inform the user that, to duplicate the remote control, it is necessary to emit the SEED CODE to realize the copy.

6b Transmit now the SEED CODE of the "SOURCE WHY EVO" pressing at the same time buttons 1 and 2 for 3 seconds until the WHITE LED switches on. While the LED is flashing, (within 10 seconds) press and keep pressed the button where you want to program the SEED CODE.

7b Now the WHITE LED of the "NEW WHY EVO" will change the flash (faster) and colour (BLUE) to confirm the correct learning of the code. This step may take a few seconds.

8b At this moment, press the NEW WHY EVO button which you want to store the code and keep pressed until the "WHY EVO" BLUE LED switches off and an extended BEEP sound is emitted to confirm the correct learning of the code.

9b The copy has been completed with success. Now check the functionality of the NEW WHY EVO remote control pressing the button where the code has been programmed. If it doesn't work, please proceed with the insertion on the receiver of the NEW WHY EVO, through the D.O.R. function, if it is present, or through the procedures given by the automation manufacturer.

Notes:
• If the WHITE LED flashes only 3 times (of WHITE color) and switches off, the code has not learnt correctly. Please repeat the operation from the step 1.
• The WHY EVO memory is completely re-writable.
• To duplicate further buttons of WHY EVO, please repeat the operation from the step 1.

TO REACTIVATE THE ROLLING SICE TECH CODE INSERTED AS DEFAULT ON A BUTTON, PROCEED AS HERE BELOW:

1. While pressing the button 1 of the WHY EVO, at the same time press button 2 four times.
2. Release both buttons. Now the WHITE LED "WHY EVO" will emit a short flash every 2 seconds.
3. Press the button where you want to reactivate the rolling code and keep pressed until the WHITE LED becomes BLUE and then switches off. At this moment, an extended BEEP will be emitted to confirm the correct reactivation.

NOTES:
To reactivate further buttons of WHY EVO, please repeat the operation form the step 1.

TO MAINTAIN THE SAME SERIAL NUMBER ON ALL 4 BUTTONS

1. While pressing the button 1 of the WHY EVO, at the same time press button 2 four times.
2. Release both buttons. Now the WHITE LED "WHY EVO" will emit a short flash every 2 seconds.
3. Place the original remote control to be programmed in front of the "WHY EVO", at about 5 cm of distance (as shown in the picture at the page 3).
4. Press and keep pressed button 1 of the original remote control and wait for a change of color (BLUE) of "WHY EVO" WHITE LED and it will switch off and emit an extended BEEP to confirm the correct learning code. This step may take a few seconds.
5. The copy has been successful.
6. Now activate the correct procedure for the copied model and insert the new remote control on the receiver (see the compatibility list present in this manual).
