

Website Audit

Overall, website is user-friendly and has a nice appeal to it.

There are a few recommendations:

- Change the website's primary color to match the social media channels
- Add mission trip to the home page, possibly under "who we are" and "join us on a mission."
- Fix the "Shop" link. It would be more user friendly if you redirected the page to the two different shops.
- Add an office's name to the phone number and the email on the contact page so people know whom they are contacting.
- Fix the "Who We Are," "What We Do" section. Sports, Medical and Community tabs all have a "service unavailable" pop-up.
