

A VISION FOR TRANSFORMING HEART HEALTH

We envision a novel, comprehensive specialty care clinic that provides a variety of treatment and education services to address the physical, mental, and overall well-being of uninsured and insured patients.

OUR MISSION

Have a Heart Clinic is committed to elevating community health in the Kentuckiana region by providing cardiovascular care, coordinated support services, health screenings and education to adult patients, regardless of their ability to pay or their insurance coverage or status.

INDIVIDUALS

COMPASSIONATE CARE

Through community partnerships, creative collaborations, and - most important - compassion, the Have A Heart Clinic's Board of Directors and volunteers have built a network of committed philanthropists who give their time, talents and treasure to combat cardiovascular disease among the most vulnerable members of our community.

Have A Heart's Coordinated Care team provides a whole health approach to treating patients at the highest risk. This approach involves Community Health Workers who build trust and facilitate patient care. Our patient-centered approach includes a Physician provider, nursing staff, clinical psychologist, social worker, dietician and pharmacists. The sole purpose of being patient-centric is to put that patient on a path to better health.

A HISTORY WITH HEART

The Have A Heart Clinic is a 501(c)(3) nonprofit organization founded on the belief that "all should have access to quality health care." We are a committed group of medical professionals, cardiovascular disease survivors, family members, and friends committed to eradicating gaps in cardiovascular treatment services for the uninsured and low-income members of our community, as well as insure patients.

Based in Louisville, Kentucky, The Have A Heart Clinic volunteer and staff specialists provide quality, complete cardiovascular care to adults, regardless of income or insurance status. Patients are diagnosed, treated and educated about heart disease and prevention.

Our unique model offers the full scope of cardiovascular services for patients regardless of their income status. We are grateful for the monetary and in-kind donations and community partnerships that have made this model successful and sustainable.
