Architect Matt Longnecker briefed the committee on some Health Life Safety items:

1. Final certificates have been given for the auditorium and high school door projects.

2. The Apollo roof project will start June 3rd and be done in early August. There will be a pre-construction meeting.

3. Paving project at the high school summer of 2019: There will be a public hearing on Wednesday, March 20, 2019 at 5:45 p.m. to amend the Health Life Safety Plan paving work. The drive that goes around the high school (west to east) will be changed from oil and chip to concrete and there will also be an alternative bid that involves the student parking lot near the tennis courts. Part of the main bid will also be sidewalk work between the Ag building and the high school.

4. Drainage problems in and around the Ag building and
the backside and east end of the high school will be bid out and repaired using O and M Funds.

5. Tuck pointing at the high school: The gym, west classroom wing and band wing will be done this summer. There are also problems with lentils in the gym building. Tuesday March 19th., Matt Longnecker will be at the high school with a structural engineer. They will have a lift and will check the lentils at eye level.

Superintendent Petrie discussed the current lawn mower problems. He plans to bid the mowing out and compare that cost to the cost of leasing a new mower and doing the mowing with district employees. He will report back to the Board of Education on the costs.

Meeting adjourned at 7:20

Respectfully Submitted,

Barbara Chiles-Chairperson and Secretary
