■ INTERESTS

Games : Obviously, I love video games. I've grown up with games like Fable, Warcraft3, World of Warcraft, Kotor, Oblivion, Fallout3... I believe those games influenced me a lot in who I am today, my art and what type of games I really enjoy today and in the end, the kind of games I want to help create. As for recent times, I love playing games such as Destiny2, DevilMayCry5, Fallout4, Apex Legends, Conan Exiles, World of Warcraft, etc...

Music : I mostly listen electro music and music from the 70's. I'm also an avid listener of game soundtracks. Fun fact, my most listened artist on Spotify in 2018 is David Arkenstone, I really love World of Warcraft's taverns soundtrack.

Other : Airsoft, Video Editing, Movies & discovering the great wide world.
