Omnilux LED Light Therapy

Omnilux Light Therapy is the only FDA approved and clinically proven to reverse the signs of skin ageing, Omnilux complements the body's own natural moisture renewal process to plump up the skin naturally. Also proven to accelerate wound & scar healing, it is ideal for post surgery recovery.

Omnilux Revive (red light) acts to rejuvenate and repair damaged skin, improve uneven skin tone and reduce the appearance of fine lines and wrinkles. Omnilux Revive delivers a precise wavelength of visible red light that penetrates deep into the skin to stimulate fibroblast activity to naturally boost the production of collagen (the protein responsible for plump, healthy skin).

Omnilux Light Therapy has been developed as a natural, non-invasive and relaxing procedure. No damage is caused to the epidermis or dermal tissue, therefore there is no downtime or unwanted side effects like swelling or peeling.

Microdermabrasion With Hydroabrasion Treatments

Microdermabrasion gives a deep exfoliation using a diamond tip wand to gently polish the face using suction which removes dead skin cells and stimulates blood flow to the skin, reducing the appearance of fine lines and generally encourages a brighter complexion.

Hydroabrasion is ultra-hydrating fluid that penetrates deep into your skin, allowing your skin cells to absorb all the nourishing ingredients it needs for a fresh and healthy new beginning.

Omnilux LED Light Therapy stimulates cellular activity. As cellular activity increases cells become more permeable and responsive to exogenous factors. Blood flow increases, leading to greater tissue oxygenation and detoxification. Skin appears clearer with less fine lines, is plumped up and hydrated.
