EQUINE PROFILE

GEORGE

Breed: Quarter Horse

Sex: Stallion

Age: 3

Height: 13 - 2 Hands

Horsenality: Right Brain Introvert

Spirit Level: Low

Training Status: Groundwork – Beginning

Background: George was owned by a quarter horse breeder who had economic difficulties. As a yearling, he was sent to a Surrender Clinic with his dam, Vera. George was extremely emaciated, undersized and full of parasites. He'd had no handling.

General Observations: George has completely recovered physically, but due to his early nutritional deprivation, he will not reach horse size. He would make a good horse for driving or for being ridden by a child. George is curious, but shy. He requires a calm, slow, considerate handler. He can panic if he feels pushed. He does have classic foundation quarter horse conformation and is quick and athletic. He's a bit of a loner among equines, so he would likely form a strong bond with the right human. George will be gelded before adoption.
