

FingerPro ID and Suprema RealScan G10™ Digital Livescan

FingerPro ID is ideal for employee background checks, security clearances, professional certifications, criminal booking, airport worker badging, healthcare professionals, childcare employees, concealed carry permits, immigration, housing, drug testing, banking and real estate licensing, fingerprinting service providers and many others.

Easy to Use Graphical User Interface

The FingerPRO ID livescan software is *extremely easy to use* with nothing to memorize; has no foot pedals; and is fast, reliable, and includes everything you need to capture, encrypt, and transmit fingerprint records either electronically or print on card for either civil background screening or criminal booking purposes.

The livescan system consists of a comprehensive suite of fully integrated software controls that capture demographic data and fingerprint images that adhere to FBI standards. This system can be configured to your needs and consists of a dedicated computer (desktop or laptop), tenprint scanner and optional products, such as palm print scanner, driver's license reader (magstripe/2-D barcode), printer and carrying case or cabinet.

High Quality, Low Cost Hardware

Suprema RealScan G10 is a high-end digital livescan fingerprint capture device for about half the cost of competing systems. It is designed for ease of use, high volume fingerprinting, mobility and IP54 rated for dust and water resistance. The RealScan G10 works with the FingerPRO ID software to perform five functions critical to the civil and criminal background check process:

- It scans and collects all 14 full-rolled/flat-slap prints needed for all federal, state, and local prints cards;
- Prints perfectly formatted hardcopy fingerprint cards;
- Stores that information into an internal integrated database for later retrieval when/if needed (user can delete if business security policies require non-storage);
- Transmits the fingerprint information to state and federal authorities either direct to the DOJ or through an *FBI Channeler*;
- Optional Print-to-Card in cases where electronic submission is not allowed.

Proven and Reliable

The FingerPRO ID software has been used for a variety of background screening use cases including many of these:

Visa/Immigration Documents

System Specifications

Computer

- Windows 7 or 8.1 OS
- 8G RAM / 500GB HD
- 2.5GHz / i5 Processor or faster
- 2 USB Ports

Printer

- Lexmark MS810N or MS810DN (FBI IAFIS Approved)

Scanner/Readers

- (Fingerprint) Suprema RealScan G10
- (Palmprint/Fingerprint) Suprema RealScan F
- (Magstripe/2D Barcode) E-Seek M280

Features & Benefits

- FBI Certified and Approved
- Intuitive User Interface
- Standalone and Client/Server Configuration
- Fixed Station and Mobile Deployment
- Supports Fingerprint Flats/Rolls and Palmprints
- Print-to-Card or Electronic Submission Capable
- Software Versions Include:
 - Civil Applicant
 - Criminal Booking
 - FBI Channeling
 - TSC (Airports)
 - OPM (Federal Employees)
 - SWFT (DOD Contractors)
- File Encryption with User Authentication
- Support for User Roles
- Full History of Every Record
- Save Files or Delete Them Based on Business Policy
- Powerful Search and Filter Tool
