

Teaming With Technology

FingerPro ID for TSC and Suprema RealScan G10 *The perfect solution for expedited airport employee background screening.*

Rapid Time to Response

FingerPRO ID for TSC can be configured for both electronic submission and print-to-card. Electronic submission enables Airports to screen employees much quicker. Once an electronic record is transmitted to the TSC, responses typically come back same day; usually minutes – not weeks.

Traceability

NO MORE LOST CARDS! You have a full history of every record and can rapidly find a single record amongst thousands and easily resubmit records to TSC as needed.

Efficient Workflow

FingerPRO ID for TSC supports replication, which means employees can be scanned once, but their record can be updated and use the fingerprint images on file to resubmit the records in subsequent years. This saves time and expedites the re-screening process.

Easy to Use Graphical User Interface

FingerPRO ID for TSC is *extremely easy to use* with nothing to memorize; has no foot pedals; no annual calibration and is fast, reliable, and includes everything you need to capture, encrypt, and transmit tenprint fingerprint records to the TSA via the Transportation Security Clearinghouse (TSC).

This system can be used to capture multiple fingerprints in a single scan (4-4-2) and then segment the fingerprints into individual fields according to FBI EBTS specifications.

Exceptional Image Quality

System Specifications

Computer

- Windows 7 or 8.1 OS
- 8G RAM / 500GB HD
- 2.0GHz / i5 Processor or faster
- 1-2 USB Ports
- Internet connection

Printer

- Lexmark MS810DN (only needed if printing to card)

Scanner/Reader

- Suprema RealScan G10

Features & Benefits

- High quality fingerprint images with quality checks and quality scoring
- Supports Fingerprint Rolls & Flats or just Flats (tenprint)
- Save, Replicate and Delete Files Based on Business Policy
- Enterprise (Client-Server) Capable for connecting multiple clients to a central database
- Full History of Every Record
- FBI Certified and Approved
- Intuitive User Interface
- Standalone and Client/Server Configuration
- Fixed Station and Mobile Deployment
- Print-to-Card or Electronic Submission Capable
- File Encryption with User Authentication
- Support for User Permissions & Roles
- Powerful Search and Filter Tool

Warranty, Maintenance & Support

- All hardware comes with a 1-Year Limited Manufacturer's Warranty. Extended Warranties are available.
- Software is sold with 1 year of SW Maintenance, which includes minor and major updates and enhancements.
- Telephone and remote login support is provided from our Mississippi headquarters during normal business hours. We pride ourselves on providing exceptional customer support!
