## **Thinklogical**

**Title: Next-Generation C3 Centre Design**

**Date: Wednesday October 9<sup>th</sup>**

**Time: 3:00 pm - 3:45 pm**

**Room: To be determine**

**Topic: *Best Practices for Enabling Instant Situational Awareness***

Ops / C3 centres have become increasingly complex as the quantity and diversity of information sources has multiplied exponentially. User needs to access these multiple sources, share information and collaborate while respecting information security requirements has driven new levels demands on technology. Thinklogical has addressed these needs through an innovative two-part technology solution. They provide an extension capability that allows computing resources to be removed from the workspace and located in a secure remote location. This extension technology is paired with a unique patented switching technology that allows any user to have access to any information source regardless of classification level while respecting information security requirements.

### **Charlie Jamieson Bio**

Director Business Development Canada

Charlie is a seasoned executive with over 35 years experience in the Canadian Aerospace, Defence, and Security business. His career has included senior leadership roles with Lockheed Martin Canada, General Dynamics Mission Systems Canada, Atlantis Systems, and Leonardo DRS Canada. He has been working with Thinklogical since 2016 supporting the Thinklogical entry into the Canadian Market.
