Title: High Quality AV over IP System Design with Christie Terra

Date: Wednesday October 9th

Time: 1:00 pm - 1:45 pm

Room: To be determine

Topic:

Christie® Terra represents an all-new AV solution enabling the transport, processing and control of audiovisual content, including 4K@60Hz video formats, over 10G Ethernet networks. Built on standardized SDVoE technology, Christie Terra provides unprecedented performance capabilities including the delivery of uncompressed, zero-frame latency, artifact-free video over readily available and affordable 10G components. This seminar will help you understand what it takes to put together a high-quality design for years of carefree AV transport.
