<sup>1</sup> We always test on the latest released versions of Chrome, Firefox, and Safari. The versions listed are the current versions at the release of the K2 smartforms version.

<sup>2</sup> Minimum required version for Silverlight is 4.0.50917.0. Silverlight is required at runtime only when Silverlight controls are used on Views or Forms.

<sup>3</sup> Plug-in support is only available in Internet Explorer on the desktop, and this version of Internet Explorer 10 must be used for items built on Silverlight, such as the K2 Workflow Designer.

<sup>4</sup> IE 8 support is limited to end-user runtime execution only - K2 smartforms runtime and K2 web parts. Issues that have no workaround and cause the end-user pages to not function can be addressed through support. Display and styling issues will not be addressed.

<sup>5</sup> Safari is only supported on Macintosh OS; Windows support for the Safari browser is deprecated as of this release.
