

The Iris Floor Lamp transforms its form and the atmosphere in a room by changing its light direction and projections. By adjusting the lamp shade you can have upward pointing light, a downward pointing light, a spot light to one direction and/or patterned light to another direction, The reflective interior of this floor lamp casts intricately patterned reflections that change as the lamp's configuration is changed. This would be the perfect light for a living room or a bedroom.

The Iris series lamps are the fruit of years of development of the patented overlapping leaves mechanism first explored in lighttexture's Steamlight series. (Patent #8,025,430) Composed of overlapping brass leaves, each Iris Lamp has two adjustable apertures; as one opens, the other closes.

**Lamp Base:** Custom Cree XPG2 housing and double row side emitting LED flexible light strip

**Wattage:** 12.9W

**Supplied bulb:** 79x LED bulbs

**Warranty:** 1 year

**Country of Manufacture:** USA

**Weight:** 22 lbs

**Listing:** All of the electrical parts are UL recognized

**Base and Shade Material:** Stainless steel or brass

**Finish:** Brushed and polished stainless steel or brass

**Cord Cover Material:** Braided black with white tracer sleeving

**Cord Length:** 7'

**Base size:** 12" diameter
