MEDICAL SPANISH SEMINAR GOALS AND OBJECTIVES

The Spanish speaking population has grown tremendously over the past few decades and healthcare providers are challenged to communicate with this expanding patient population.

The goal of this conference is to teach basic, intermediate and advanced Medical Spanish language skills in the classroom and to implement the usage of these skills with native Spanish speakers in an immersion setting. At the conclusion of this conference, participants should be able to improve their knowledge of Medical Spanish with the ability to converse and take basic medical histories from Spanish speaking patients and have the ability to give simple commands and instructions to this patient population. Although excellent instruction and resources will be made available, it is up to the student to spend time outside of class to reach individual goals. A full textbook in addition to many classroom materials are provided for the implementation of this objective.

We do encourage every student to build a knowledge base for more advanced Spanish coursework in the future. The opportunity is available for students to attend additional courses to build on their knowledge base. Grammatical structure, common phrases, and medical vocabulary will assist students in acquiring conversational engagement skills and develop a deeper understanding of Spanish in the healthcare setting. Their advice will be more readily accepted by their Spanish speaking patients and perceived patient satisfaction ratings will increase.

Physician Accreditation

PHYSICIAN ACCREDITATION STATEMENT:

The University of North Texas Health Science Center is accredited by the American Osteopathic Association to award continuing medical education to physicians.

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of the University of North Texas Health Science Center and Medical Studies Abroad. The University of North Texas Health Science Center is accredited by the ACCME to provide continuing medical education for physicians.
