**V**IDEO RECORDINGS OF TEAM MEETINGS provide huge potential in understanding interactional processes in organizations. This APA webinar provides a tutorial into the basic foundations of sequential analyses. To illustrate the methodological approach, I present data from a video study of project team meetings. Overall, this webinar aims to provide a hands-on tutorial for running sequential analyses using timed-event coded data.

*For registration questions, contact Sonja Wiggins, MBA, APA Division Services, at [swiggins@apa.org](mailto:swiggins@apa.org) or 202-336-5590.*

**FLORIAN KLONEK** is a postdoc in the Centre for Transformative Work Design at the University of Western Australia. Using video-methods, he studies socio-interactional and motivational dynamics in a variety of organizational and social settings (e.g., teams, leader-follower interactions) to better understand the temporal dynamics of social behavior.
