2018 Spring Diagnostic Ultrasound and Breast Imaging Conference

Current Concepts in
Diagnostic Ultrasound
and Breast Imaging

REGISTRATION BROCHURE

June 2-3, 2018

Pasadena Convention Center

Pasadena, CA

YOU'RE INVITED

In its 43rd year, and for the second year in a row, LARS is combining its Spring Diagnostic Ultrasound Conference with the Summer Seminar in Breast Imaging.

This year's Conference features concurrent sessions in OB/GYN, General and Musculoskeletal Ultrasound and a 1-day session on Vascular topics. The Breast Imaging session is a 1-day program featuring multimodality imaging techniques in the evaluation of the breast.

Presented by a faculty of nationally recognized experts, this conference is for Radiologists, Technologists and Members-in-Training to attend sessions designed specifically to address current topics in ultrasound and breast imaging. Attendees will be able to apply state-of-the-art techniques, optimize protocols, recognize current indications for ultrasound and breast imaging as well as correlative imaging modalities, and identify imaging patterns of various diseases.

We have designed this program with you in mind. Our goal is to present the knowledge and skills needed to update and expand current clinical practice with the goal of improving patient outcomes and quality of life through improved diagnostics. You may choose to attend an entire focus session or mix lectures from multiple sessions to meet your individual educational needs and interests.

You will also have a chance to connect with and stay up-to-date with cutting-edge technology vendors in the exhibit hall. Make the most of the scheduled breaks in the educational sessions by visiting the exhibit hall, which is intended to complement the educational program by providing a forum for professional exchange of the latest, most accurate information available regarding the benefits, risks, and appropriate use of the products, technologies, and services available to radiology, ultrasound and breast imaging.

See You in Pasadena!

EDUCATIONAL OBJECTIVES

At the conclusion of the Ultrasound sessions, participants will be able to:

- Understand new entities and diagnostic criteria that can be applied in daily practice
- Identify pathological findings on ultrasound associated with bowel diseases presenting with abdominal pain, including appendicitis
- Apply knowledge on a wide variety of ultrasound topics, including adnexal masses in pregnancy, contrast enhanced ultrasound, characterization of thyroid nodules, scrotal masses and controversial cases
- Develop a surveillance strategy for certain prenatal infections
- Discuss and review standard imaging protocols of the shoulder and hip
- Better implement contrast enhanced ultrasound in their practice

At the conclusion of the Breast Imaging sessions, participants will be able to:

- Evaluate liver, renal and pancreas transplants with ultrasound and identify graft abnormalities.
- Describe benign and malignant processes involving the nipple areolar complex
- Apply recommended imaging work up and management of unusual but not uncommon clinical complaints in young women, pregnant women, and men
- Apply recommended management of BIRADS 3 lesions on mammography, ultrasound, and MRI to clinical practice
- Review the role of background parenchymal enhancement on MRI and avoid pitfalls
- Apply the rules of the MRI audit

to clinical practice

- Describe current literature regarding the management of axillary lymph nodes and apply updated guidelines to clinical practice
- Review the normal and abnormal imaging appearances after breast implant placement and reconstructive surgery

The 43rd Annual Spring Conference has been planned in accordance with the ACCME Criteria, Policies, and Standards for CME Activities. Further, this activity is in compliance with the California Legislature and ACCME definitions of CME Content, and California Assembly Bill 1195 and its amendments which require CME activities with patient care components to include curriculum in the subjects of cultural and linguistic competency. LARS accepts responsibility for validating the clinical content of this CME activity.

CONTINUING EDUCATION CREDIT

Accreditation Statement

The Los Angeles Radiological Society (LARS) is accredited by the Institute for Medical Quality/California Medical Association (IMQ/CMA) to provide continuing medical education for physicians.

Designation Statement

LARS designates this live activity for a maximum of 27 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

DISCLOSURES

Unless noted, there are no other financial relationships with commercial interests to disclose.
