

## BRIDGE SYSTEMS

Multiple bridges can be supplied for both ceiling mounted and free standing systems, thus allowing multiple workers to utilize the system simultaneously.

## CEILING MOUNTED MONORAIL

When floor space is at a premium, ceiling mounted monorails can provide unparalleled fall protection while maintaining an open floor plan for material handling, production, or related activities.

## FREE STANDING CANTILEVERED MONORAIL

Available in heights up to 26 feet to effectively protect workers maintaining, inspecting, or loading and unloading railcars, tankers or flatbed trucks.

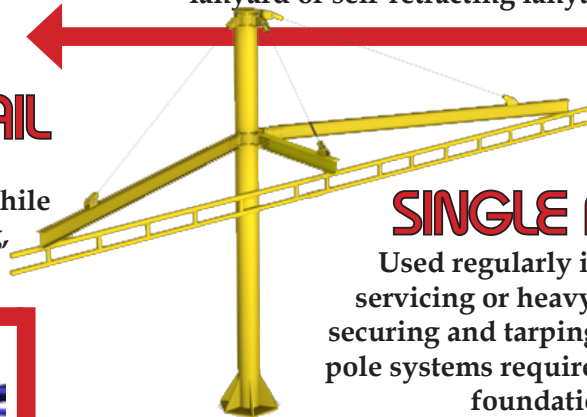

## SWING ARM

Provides circular or semi-circular fall protection with a compact footprint. Versatile and infinitely variable, simply position the swing arm over the work space and swing it out of the way when not in use.

# FALL ARREST 101

A Fall Arrest System is an active means of protecting workers from injury due to falls. A complete personal fall arrest system includes an anchor, a body harness and a connector- such as a shock-absorbing fall arrest lanyard or self-retracting lanyard

## SINGLE POLE

Used regularly in tank car servicing or heavy-duty truck securing and tarping areas, single pole systems require only a single foundation.

## FOLD AWAY

Deploy it when you need it, and fold it back when you're done, maintaining productivity without compromising safety
