

LaGuardia Terminal B Redevelopment – Eastern Concourse Fact Sheet

LaGuardia Gateway Partners (LGP) is the private organization selected by Governor Andrew Cuomo and the Port Authority of New York and New Jersey to operate and rebuild Terminal B at LaGuardia Airport. The LaGuardia Terminal B project – valued at \$5.1B (including \$4B in construction value) is the largest public-private partnership in U.S. aviation history. The redevelopment includes a new 35-gate terminal, a Central Hall, a parking garage, related roadways and supporting infrastructure – all with innovative construction phasing, including building over-top of the current operation, to allow the terminal to remain fully functional while under construction. As part of Governor Cuomo’s vision, the Central Hall will unify the airport by connecting to Terminal C, which is also being redeveloped.

When complete, Terminal B will completely redefine the guest experience at LaGuardia. The new Terminal will offer best-in-class retail, food and beverage, and amenities that will more than double the current number of offerings. Dual pedestrian bridges will span active aircraft taxi lanes – the first in the world – and connect the main part of the terminal to two island concourses. Passengers will walk above aircraft as they make their way to their gate, all while enjoying views of the iconic Manhattan skyline. In addition, this island and bridge design will increase the taxi-way space for aircraft. Terminal B will truly celebrate the best of New York – and serve as a gateway we can all be proud of.
