HEARING SCREENING

The Ohio State University Speech-Language-Hearing Clinic will be at Focus Learning Academy Southwest on Wednesday, December 6, 2017 to provide hearing screenings. All screenings will be performed under the supervision of a licensed audiologist. Hearing screening consists of both pure-tone screening and tympanometry. Pure-tone screening requires your child to listen to "beeps" presented at different frequencies under headphones. Tympanometry assists in determining how the eardrum is moving. The pure-tone and tympanometry screening determine if hearing is within the normal range and if there is normal middle ear function.

CONSENT FORM FOR HEARING SCREENING ON WEDNESDAY, DECEMBER 6, 2017

Name: _____

Date of Birth: _____ Age: _____

I give my permission to have my/my child's hearing screened by The Ohio State University Speech-Language-Hearing Clinic.
