**PATTERN ALTERATIONS AND BODY MEASUREMENTS FOR THE RIGHT FIT**

Saturday April 7th
10:00 am – 5:00 pm

$100.00 + HST + Kit fee: $20.00

In this hands-on workshop you will learn how to identify the fitting problems and how to solve them. Ron will show how to correct fitting problems regarding sloping and square shoulders, large bust, high and low bust, removal of a bust dart, broad and round upper back, sway back or down-sloping back waistline, large upper arm, tight armholes, flat seat and many more. We will also take 28 body measurements for you: high bust, low bust, shoulder width, sleeve length, back waist length, pant and skirt length... plus more... a total of 28 body measurements. Every student will have an alteration package to take home with them showing all the alterations that they have done. Ron will give you the inside answer on what pattern companies run larger and which ones tend to run true to measurements. He will also explain how much wearing ease you need in all garments from close fitting, fitted, semi fitted, loose fitted and very loose fitted. Take the guess work out of trying to choose what size garment by finding the “finished garment measurements” and not using the sizes on the back of the pattern envelope. See the difference in sizing charts in major pattern companies and how to choose the right size for you and how to avoid disappointment in fitting. **Remember to ask for your supply list and pre-class instructions.**

She got her first computerized machine, the Janome 11,000, roughly 12 years ago at the age of 77 and there’s been no stopping her since! Joy enjoys life as a young 89 year old fabricaholic and wants to encourage others by sharing her story, enthusiasm, and passion. She sits at her Janome 15,000 most days and says there’s still so much she doesn’t know and wants to learn. She will bring some show and tell, but she wants you to know that she didn’t make them to brag and that she is not a perfectionist but she loves doing it. Joy is an inspiration to all of us.
