

SAOL3/SAOL3P

Low Intensity LED Aviation Obstruction Light

Obtained Certification from (ICAO) the International Civil Aviation Organization

- Low intensity B type aviation obstruction lights are installed onto fixed objects that are less than 150m from the land or water surface.
Applied on tall structures for collision avoidance measures and airport runway safety.
- LED light bulbs with increased lifetime decreases the replacement cost of the light source (LED lasts 25 times longer than a standard lamp bulb)
- Excellent durability from a selection of a polycarbonate or an aluminium housing structure
- Built-in SUN switch available upon request which activates a system that automatically operates the product when darkness is detected
- Protection rating : IP66
- Certificates : ICAO compliant
- Luminous intensity :48cd/m
