

2016 Forty Under 40 Honoree

Clement Chung

*Project manager
 LaBella Associates DPC*

Age: 39

Education: Master of Engineering, civil and environmental engineering, Imperial College of Science, Technology & Medicine, University of London, London; Associateship of the City and Guilds of London Institute, civil and environmental engineering

Family: Wife, Katina Zoe Antoniadis; son, 5

Residence: Brighton

Professional responsibilities: I am a licensed professional engineer who provides civil engineering and management services for water and wastewater projects in multiple states. Projects I work on include evaluation, design and construction of treatment facilities, distribution and collection systems and evaluation of public health issues including lead contamination of drinking water supplies.

Professional and community leadership: President, Rochester Section, American Society of Civil Engineers; member, Steering Committee, Finger Lakes Hub, Empire State STEM Learning Network; member, Policy Board, Brighton Teacher Center, Brighton Central School District; former member, board of directors, Greater Rochester Chamber of Commerce; former chairman, Advisory Committee, RocCity Coalition

Bringing about change in Rochester: I hope to continue to work to attract, retain and empower young professionals in Rochester that I started with RocCity Coalition's Vision 2025 project. I will also continue to employ my background in engineering to support equitable access to quality STEM education opportunities across the region.

Surprising fact: I was an avid rugby player in high school. I've played every single position on the field, which is interesting given how small I am! My specialty is tackling, because without my glasses, I can't tell how big the guy coming towards me is and I have no fear!
