

Green Schools News

Its amazing to see the beautiful blue sky shining over Castlebar over the past few weeks and to hear all the birds singing first thing in the morning and late in the evenings. The earth is really getting a break from all the pollution that our cars make when we are travelling to school which is a positive thing that we can take from this lockdown.

The Green Schools Committee are missing the usual things that we normally do at this stage of the year, like the check ups on lights being turned off, making sure that the taps are all turned off and especially our COW and WOW days.

To help us make sure that everyone is staying active and instead of the COW and WOW days, Green Schools has come up with an exciting idea. We have also had a great idea!!!

The first one is to see what the beautiful places and objects within our 5km limit are. The committee would love if you could take pictures of these places, send them in with a short description and then we hope to do a slide show of all

the fantastic places around Castlebar.

The 2nd idea that we had was, measuring the distance from your house to St. Angela's. Then seeing how many times you can walk that distance over the next few weeks.

We will start this challenge on Monday the 25th of May and keep it up for 2 weeks. We bet that if you keep a record of the amount you walk, cycle or scoot we would get up and down Croagh Patrick a few times a day.

Are you up for these challenges?????

If so please take your photos and email them to schoolclosure2020@stangelasns.ie and put the heading Green Schools in the subject bar.

For the 2nd challenge you can email the results on Friday June 5th to the same email address.

In the meantime, keep safe, healthy and keep washing those hands (but be sure to turn off the tap!)

From

The Green Schools
Committee.
