

Tactical Behavior Science

OFFICER SAFETY CRITICAL COURSE

A one-day intensive skills course from America's leading human behavior expert. Guaranteed to be the most groundbreaking behavior course in the world, and equip your officers with the tools, techniques and skills to meet the challenges of today's law enforcement.

[Watch the video here.](#)

OVERVIEW

This 8-hour class presents science and tactics for recognizing violent behavior, reading proven nonverbal signals, and field interrogation techniques to enhance officer safety, and human compliance. Law enforcement officers face the very unique challenge of maintaining community relations and facing potential violence simultaneously. The ability to read and influence human behavior at this level will give officers the ability to assess situations with greater clarity, improve community trust, and obtain compliance in difficult situations.

The class is for law enforcement professionals of all levels and provides key insights that aren't available in any other behavior program.

BEHAVIOR SCIENCE SKILLS

The behavior science module introduces advanced skills, nonverbal analysis, deception detection and recognizing stress-response behavior. These science-based skills carry into the field allowing officers to interpret behavior that would have gone unnoticed.

This course also introduces The Behavioral Table of Elements (BToE), the body language system designed for US Government operations. The BToE is included electronically and in student handouts.

- Behavior profiling
- Stress behaviors
- Deception detection
- Tactical body language analysis

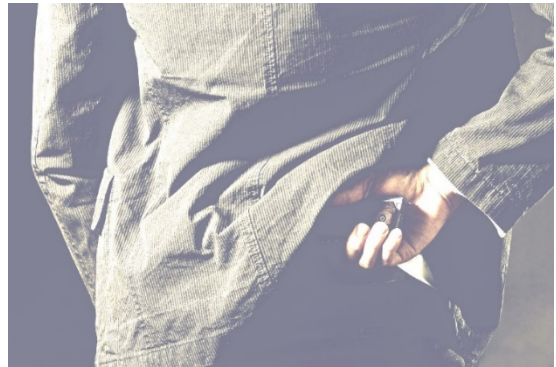

VIOLENT BEHAVIOR RECOGNITION

84% of recorded attacks on officers have had pre-violent indicators that could have been spotted early by an officer trained in violent behavior recognition.

This course covers the OODA loop (the officer's decision process) and introduces the TFCA cycle (the suspect's decision process) and how the TFCA cycle allows us to spot violent behavior, giving the officer more time to make decisions and save lives.

- Science-backed violent behavior signals
- Breakthrough training methods to spot violent behavior
- Video analysis of violent-action cases
- OODA loop and TFCA cycle

ENHANCED HUMAN COMPLIANCE

This module of the course covers methods designed to enhance compliance, build community trust, and drastically improve the effectiveness of field interviews.

- Advanced in-field influence strategies
- Leveraging and increasing perceived authority
- Trust-building
- Science and evidence presentation
- Authority tactics and techniques
- Compliance enhancement for field interviews

COURSE COSTS AND REQUIREMENTS

To cover all printing and material costs, as well as instructor travel, lodging, per diem, transportation and compensation, the individual student fee is only \$195.00. Note that there are member discounts, and bulk purchasing discounts for departments or agencies that want to send multiple officers to the course. There is a minimum requirement of 30 students for each course offering, with a deadline for registrations and/or purchase orders 30 days in advance of the class convening date. Host agencies are asked to provide a classroom area capable of holding up to 75 people, with tables and chairs for students, power point projector and screen, white board and writing easel for the instructor(s).

It's time to give officers the tools and ability build trust in your community, and to de-escalate situations. Send us an email at info@nmlea.org, and we will plan a course that meets your schedule and deliver it to your doorstep.
