### WEDDING PHOTOGRAPHY SUCCESS GUIDE | PREPARATION PHOTOS

1.) Assign a Bridesmaid/Groomsman or someone that will be present in those rooms to tidy up about 20 minutes before the photographer arrives.

It's important that they remove all trash from out of sight-water bottles, cans, food, wrappers, etc. Then have them get a handle on all the bags, purses, clothing, shoes, sandals, etc. and have them move them to a corner or closet in the room, or they can hide them in the bathroom. If there's a large tub that isn't going to be used or hasn't been used recently it's a great place for everyone's belongings. Make sure this person knows and understands they are our go-to person for help in moving furniture around if necessary and gathering accessories from point 3.

2.) Have the hair/make-up person set up by a big window that lets in a lot of light or the most beautiful spot in the room. Make sure this spot is free of clutter and trash. If there isn't a nice window, there may be a beautiful mirror or something interesting like that. Have that person use their best judgement, and then make sure there's nothing that would pull focus from you in the way-a big chair beside it, a bed, a couch, etc.

3.) Have all garments and accessories together and easily accessible for us. We will be taking detail pictures of the dress and shoes/etc before you put them on, so these items need to be easily grabbed.

Things to include:

garters

dress

shoes

rings

ties

bouquets

boutineers

letters/gifts for one another

veil

Special dress hanger
