Subject: GRAS
Attachments: Niagen - GRAS.pdf, pTeroPure GRAS Report.pdf

Loren - We need to self-affirm nicotinamide riboside chloride which was already sent to the FDA and the submission is attached. Our material does have a slightly different manufacturing process but all of the key raw materials and basic chemistry is exactly the same.

We also need to self-affirm pterostilbene. Again, ChromaDex had self-affirmed their material and provided the attached dossier to us.
