

CFS HEALTHSCAN

Customer First Solutions solves your
Covid - 19 safety and compliance
challenges!

As industries reopen during Covid-19, businesses must adhere to screening regulations to ensure employee safety to mitigate the spread of virus in the workplace.

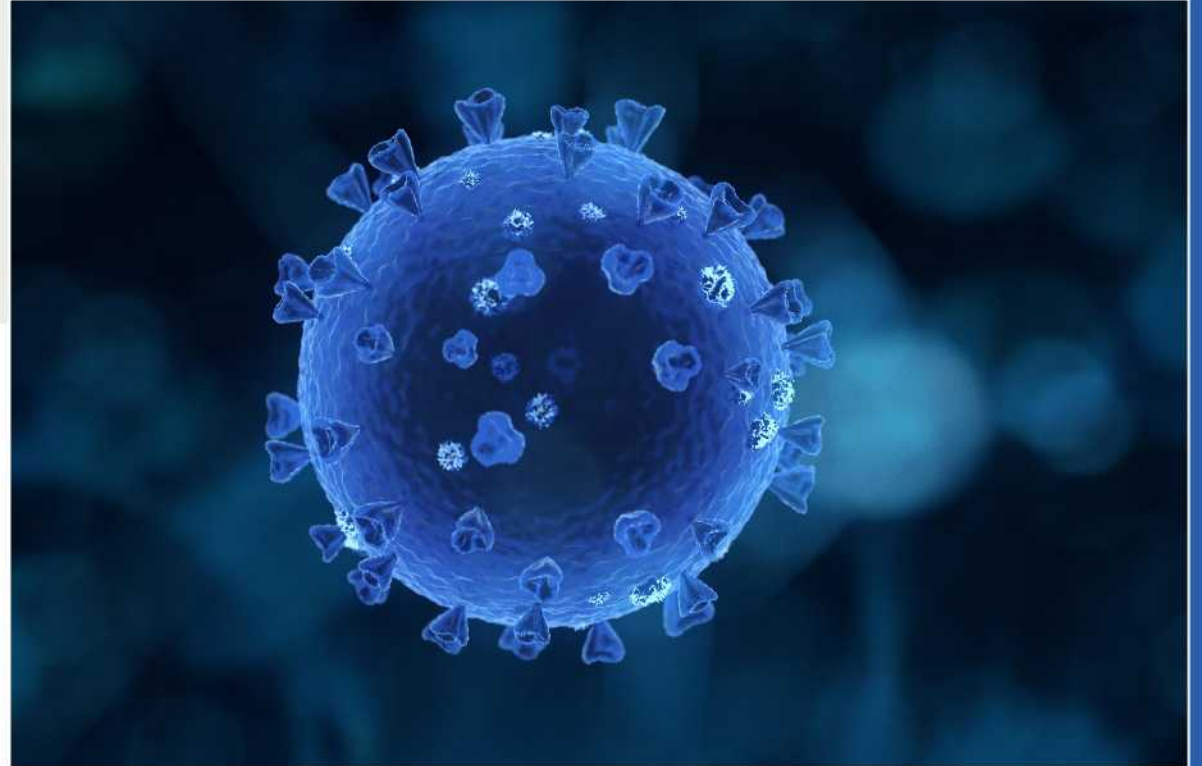

We focus on removing and improving outdated paper and manual systems that we are exposed to on a daily basis.

CFS Healthscan manages daily prescreening and onsite screening of employees and/or customers to ascertain whether they have any of the observable symptoms associated with Covid-19 and enables you to track the health of your employees/customers and provide a safe working environment that is without risks to their health.

WHY DO YOU NEED CFS HEALTHSCAN?

CFS Healthscreen offers the complete Covid-19 screening solution:

- Real-time onsite screening
- Daily online risk assessments before arrival at work
- Pre-screening and on-site screening for visitors
- Daily readings captured for each person
- Automatic alert notifications sent to the compliance or HR officers for flagged issues and high temperatures
- Real-time screening reports available through the easy-to-use dashboards

CFS HEALTHSCAN

Pre-Screening:

STEP 1:

Employees: Pre-screen on the CFS Healthscan app.

Visitors: Get sent a link together with the booking reminder.

STEP 2:

The employee/customer completes the risk assessment and submits.

Employees/customers who pass the assessment, receive an access pass and who fail the self-assessment receive a red notice, not to come to work and internal HR will be alerted.

STEP 3:

The employee/customer who received an access pass, enters the premises.

CFS HEALTHSCAN

Pre-Screening:

STEP 4:

The representative completes the health check by scanning the temperature.

STEP 5:

If the temperature is too high, access is denied an internal alert is sent to the designated person.

CFS HEALTHSCAN

On-site screening:

STEP 1:

Employees: Can either screen on the app on their phone or use a mobile device in the salon.

Visitors: Can either scan a QR code or make use of mobile device in the salon to screen.

STEP 2:

The risk assessment is then done together with the temperature reading.

STEP 3:

Those who pass will be given access.

Those who fail, access is denied, and the appropriate protocols are followed.

Efficient COVID-19 screening solution for employees and visitors:

REALTIME WORKFLOW AND REPORTING:

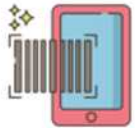

Provides real-time reporting on all health related data collected.

We use simple and standard dashboards and widgets to show all your data analytics. Workflows are standardised for all email notifications, daily, weekly reports.

HOW MUCH DOES IT COST?

Monthly recurring subscription and is both module and tier-based on the number of employees and users. Both solutions are extremely cost-effective and packed with benefits!

HOW DOES THE BARCODE WORK?

Both solutions work on any camera-enabled phone or tablet, the employer screening team use a unique link to conduct the onsite health screening with the employees.

The barcode is linked to the employee/visitor profile and will be active on all valid permits, the barcode is scanned by the onsite team for recording all temperature checks.

DO I NEED TO BUY A INFRA-RED THERMOMETER?

Yes, it is used to record the reading, so you will require an infra-red thermometer to take the actual reading.

ACCESS CONTROL

Employees who fail the self-assessment receive a red notice to not come to work, and internal HR are notified. Employees who fail the on-site screening will not be able to enter and the relevant compliance officer is notified.

COMPLIANCE AUDIT

You have a fully auditable record of your Covid-19 Screening processes. Implementing employee screening is a requirement for a return to work, and using this system will ensure that you meet all government requirements in terms of screening.

KEY BENEFITS:
