Heavy Equipment Recovered in Hudson Hope

According to RCMP, on the evening of Wednesday February 12th, just before 8:00pm, Hudson's Hope RCMP received a report of an incident taking place at the intersection of Highway 29 North and Farrell Creek Road.

Photo of recovery from Energetic City

Hudson's Hope RCMP have made arrests after the recovery of stolen heavy equipment.

Police were informed that a white Ford 3F-50 truck had been spotted travelling southbound from Wonowon towards Hudson's Hope, towing a black flat deck trailer carrying a yellow skid steer. They also learned that the skid steer had been reported as stolen from the Fort Nelson area the night prior.

With the assistance of Fort St. John, Chetwynd RCMP, and a few police dogs, one suspect surrendered at 10:00 p.m. February 12th to Hudson's Hope RCMP and a second suspect was located on Thursday morning.

A 36-year-old Quesnel man and a 42-year-old Williams Lake man both face property theft, firearms and drug-related charges.

Chetwynd and District Rec Centre

Arena Concession Request for Proposals

The Chetwynd and District Rec Centre is inviting proposals from individuals, groups, organizations, and/or businesses for the operation of the facility concession and the provision of catering services for the period of April 1, 2020 to March 31, 2024.

All applicants must provide a business management plan that includes:

- Budget
- Safe Food Plan to be approved by the Health Authority
- Sample menu selection with prices
- Proposed hours of operation
- Catering activity plan
- Record of past performance
- References

Any other information that may be pertinent to a successful operation
Viewing of the facilities is required prior to submitting any proposal and further contract specifications and requirements are available to bidders at time of viewing. Contact Steve McLain by phone at 250-788-2214 or by email at smclain@gochetwynd.com for an appointment to view the facilities and to view and pick up contract documents.

Proposals should be submitted to:

"Chetwynd and District Rec Centre Concession Proposal", ATTN:
Steve McLain, Director of
Recreation for the District of Chetwynd, 4552 North Access Road,
Chetwynd, BC, V0C 1J0.

Deadline for receipt of proposals is 2:00 pm, local time, March 1, 2020. The Peace River Regional District and the District of Chetwynd reserves the right to reject any and all proposals for any reason, or to accept any proposal received which the Peace River Regional District and the District of Chetwynd, in their unrestricted discretion deems most advantageous to their selves. The greatest or any proposal may not necessarily be accepted.

STOP THE SPREAD OF UPPER RESPIRATORY INFECTIONS

The common cold and most other upper respiratory infections are caused by viruses. Upper respiratory infections are acute illnesses that affect the nasal passages and throat. In fact, viral infections like colds are one of the leading causes of unplanned time off work and school. The average adult experiences two to three colds every year, and children can have even more.

To help stop the spread, Walid Shammam MD, VP scientific affairs, Avrio Health Canada, shares his top tips to help you stay healthy this cold season.

Wash your hands.

The single most effective way to stop the spread of viruses is to wash your hands regularly.

It seems obvious, but many Canadians aren't doing it. Wash your hands thoroughly with soap and warm water, especially after touching any shared surfaces such as door knobs, public transit, money, shopping carts and elevator buttons.

Avoid touching your face.

A study conducted by the University of New South Wales observed that people in the study touched their face up to 23 times per hour, and that almost half of all face touches included the nose, mouth and eyes.

Viruses that cause colds enter the body through the upper respiratory system, with the nose and mouth being key entry sites. To prevent the spread of viruses, avoid touching your face where viruses can easily transfer from your hands into your body.

Treat upper respiratory infections at the very first sign.

If you do feel a cold coming on, you can help treat your virus with an early infection treatment product. The new Betadine Cold Defence Nasal Spray can shorten the duration of a cold by trapping and disabling viruses in the nasal passage and preventing them from spreading and multiplying. It is clinically proven to block viruses by creating a barrier so you can help stop the spread of upper respiratory infections this cold season.

Home upgrade

Revamp. Restore. Renovate.

How to update your kitchen on a budget

Is your kitchen looking a little dated? Do you long for a new cooking space, but lack the budget? If so, here are some affordable ways to revitalize this room.

- **Apply some paint.** A fresh coat of colour on the walls is an easy way to refresh a tired

looking space. Or, if your cabinets are in good condition, consider giving them a facelift by painting the doors and frames.

- **Use open shelving.** New cabinets are expensive and may not be necessary. Make your space more modern and inviting by removing one or more of the upper cabinets and replacing them with open shelves.
- **Upgrade the countertops.** Natural stone and quartz countertops aren't exactly budget-friendly, but there are lots of options that mimic the look without the high cost. Think high-end laminate or tile.
- **Update the hardware.** New pulls, handles and knobs can make a big impact. This is a simple and inexpensive upgrade that can be done in less than an hour.

The kitchen is often the heart of a home, so make yours a place you love to be.

3 signs it's time to update your plumbing

Though the plumbing components in your home can work for years at a time without fail, they do have a limited lifespan. Here are three signs it may be time to update yours.

1. MURKY WATER

Water that's brown, yellow or otherwise tinted is usually cause for concern. It could indicate that there's corrosion in the pipes. When this happens, minerals build up and cause pressure, which in turn can cause the pipes to burst.

2. OUTDATED PIPES

Modern plumbing systems use PVC, copper or brass pipes. Older houses usually have pipes made of galvanized steel, cast iron or lead. Each material has a limited lifespan.

Copper can last up to 80 years. Brass, cast iron and galvanized steel, however, may be good for up to 100 years. Modern PVC pipes will hold for a maximum of 45 years.

If the pipes have outlasted their natural lifespan, it's time to replace them.

3. UNPLEASANT ODOURS

If you detect a foul odour coming from your tap, it could indicate that there is mould or mildew inside the pipes or in the wall around the plumbing. Not only is this unpleasant, but it could pose a health risk.

If your home is at least 60 years old, there's a good chance that some of your pipes are exposed. If so, take a look at them regularly. If you spot any flakes, bumps or other signs of damage, it may be time to have the whole system inspected by a plumber.

If your home has lead pipes, you must replace them ASAP. Lead is highly toxic and can make you and your family sick.
