## Dawson Creek RCMP seek tips on 45 year old missing person case

Dawson Creek RCMP are requesting the public's assistance in a 45 year old missing person investigation.

On August 15th, 1974, the detachment received a report of a missing male from a family member in Fort St. John.

Murphy Williams was last seen around 3 AM on August 15th at a farm residence near Mile 30 on the Alaska Highway, where he had been working for the previous two days.

It is reported that Williams was "acting strangely" throughout the night and when the farmer at the residence woke up around 7:30 that morning, Williams was not located. A search of the property and the surrounding area turned up negative.

Williams, who was 35 years old at the time of his disappearance, is described as Aboriginal, approximately 5'8" and about 170 pounds.

The detachment reports that multiple resources have been utilized in this case, including RCMP Police Dog Services, RCMP Air Support Services and Search and Rescue.

Anyone with information on Williams' location or his disappearance is asked to contact the Dawson Creek RCMP detachment or Crime Stoppers.

## EXPAND YOUR LIVING SPACE WITH A BASEMENT MAKEOVER

If you're not using your basement for everyday living, you're losing out on at least a third of your home's square footage. Here are some tips to transform it into a space where you want to spend time:

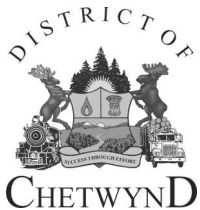

Control the air flow. Basements that haven't been well maintained can have a host of problems that cause them to be colder than they should be – many of which have quick DIY fixes.

Inspect your perimeter and seal any air leaks. If your windows are the culprit, try caulking around them. If that doesn't work, replacing them with energy efficient ones is worth the investment.

Welcome with cozy accents. Create an inviting atmosphere that makes you want to curl up on the couch and read, or watch a good movie, by incorporating cozy accents with rich textures. Think fluffy blankets, pillows and slippers in materials like fleece, flannel, sherpa and faux fur.

Choose a quality subfloor. Even premium carpet or engineered hardwood won't keep your floors feeling warm without the right subfloor. As the foundation for your basement, a subfloor is an essential step you can't afford to skip. To help protect against moisture, mould and mildew, and to make floors feel warmer by insulating against the cold concrete. A subfloor is easy to install and a whole room can be done in half a day.

Add warmth. Make up for any lack in sunlight and the warmth it brings with added sources of heat. A wood-burning oven or fireplace can create a relaxing environment that's inviting after coming in from the cold. Even a gas fireplace can have the same effect. Scented candles used safely will also do the trick if you want to keep costs down.
