I was getting ready for a tag sale one summer day. Since it was so humid out, I decided to stay inside my air-conditioned house and mark the special stickers I had bought for the sale. Then I slapped them on my blouse, ran outside, stuck them on the appropriate items and rushed back inside. I did this until every item was labeled. Later that day a UPS man came by the house with a delivery. I noticed that as I was signing for the package, he seemed ill at ease. It was only after he left that I noticed there was one sticker still attached to the front of my blouse. It read "Make me an offer."

Peace River water flow changes

We want to remind users of the Peace River that water releases from the W.A.C. Bennett and Peace Canyon dams can change suddenly and without warning.

Water is released either by normal turbine discharge, or less often, from the spillway. River levels will also rise and fall rapidly with changing dam discharges.

Please follow all warning signs, which are posted for your safety.

The zone between W.A.C. Bennett dam to 100 metres south of Gething Creek on Dinosaur Reservoir, and the zone between Peace Canyon dam and the Peace River Bridge are extremely dangerous, due to their proximity to the dams. The public is prohibited from entering these zones.
