

DISCOVERING & DEVELOPING THE LEADERSHIP POTENTIAL IN YOUR BUILDING

PASCD Annual Conference 2014
Hershey, Pennsylvania

As in any organization, the individuals within each school have unique skill sets, passions, and experiences. How often are these unique qualities recognized and fostered in K-12 faculties? Leveraging teachers' inherent passions and allowing them to share their expertise not only builds a strong culture of collaboration among faculty but also empowers individuals to see themselves as leaders with valuable knowledge and skills to build capacity within the school and to empower student success beyond the classroom.
