

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Invesco Distribution Fund (UK) (the "Fund")

A sub-fund of Invesco Fixed Interest Investment Series ICVC (the "Company")

Z Income share class (ISIN: GB00B8N45436) (the "Share Class")

The Fund is managed by Invesco Fund Managers Limited, part of the Invesco Group.

Objectives and Investment Policy

- The objective of the Fund is to achieve a combination of income and capital growth over the medium to long term.
- The Fund invests primarily in corporate and government fixed interest and other debt securities (which may be sub-investment grade or have no credit rating) and shares of companies globally.
- The Fund may use derivatives (complex instruments) and other financially linked instruments in order to meet the Fund's investment objective and to reduce risk, minimise costs and/or generate additional capital or income.
- The Fund is actively managed within its objectives and is not constrained by a benchmark.
- The reference to (UK) in the Fund name only relates to the Fund's domicile and is unrelated to the Fund's objectives and investment policy.
- You can buy, sell and switch shares in the Fund on any UK business day.
- Any income from your investment will be paid monthly.
- Recommendation: The Fund may not be appropriate if you plan to withdraw your money within 5 years.

Risk and Reward Profile

- The Share Class is in risk category 3 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and you may not get back the full amount invested. Over time, inflation may erode the value of investments.
- As one of the key objectives of the Fund is to provide income, the ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.
- The securities that the Fund invests in may not always make interest and other payments nor is the solvency of the issuers guaranteed. Market conditions, such as a decrease in market liquidity for the securities in which the Fund invests, may mean that the Fund may not be able to sell those securities at their true value. These risks increase where the Fund invests in high yield or lower credit quality bonds and where we use derivatives.
- The Fund has the ability to make use of financial derivatives (complex instruments) which may result in the Fund being leveraged and can result in large fluctuations in the value of the Fund. Leverage on certain types of transactions including derivatives may impair the Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Fund not to achieve its intended objective. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the Fund being exposed to a greater loss than the initial investment.
- The Fund may be exposed to counterparty risk should an entity with which the Fund does business become insolvent resulting in financial loss.
- The Fund's performance may be adversely affected by variations in interest rates.
- The Fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.
- A more detailed description of risk factors that apply to this Fund is set out in Section 30 of the Prospectus.
