To Whom It May Concern,

Rocky Mountain Power is currently offering qualifying customers a ductwork system inspection and will seal leaky ducts in electrically heated and electrically cooled manufactured homes completely free of charge. Through our wattsmart Home Energy Savings program, this service is available for a limited time only and at no cost to owners and tenants of electrically heated manufactured homes using heat pumps or electric forced air furnaces and electrically cooled manufactured homes using central air conditioning. Work will be performed on a first-come, first-served basis.

Energy Experts is participating with the program to solicit no-cost duct inspection and duct sealing services for Rocky Mountain Power residential customers living in manufactured homes.

If you have any questions or concerns regarding the work being performed by Energy Experts, please contact our Trade Ally Coordinator at 800-942-0281.

For more information about our wattsmart programs and cash incentives, please visit **[bewattsmart.com](http://bewattsmart.com)**.

Sincerely,

Greg Stiles  
Energy Efficiency Program Manager
