**Crack NEET/IIT**

**Physics**

**(NEET) is governed by CBSE Board. It is one of the toughest competitive exams for students who seek admission into different medical courses such as MBBS and BDS. In fact, NEET is the only medical entrance examination organised for admission in various medical courses, and a large number of students appear for this exam. Proper preparation is essential to crack the exam. Even students who have dropped out from NEET can re-appear for this examination and score good grades.**

**Listed below are some tips that can help students to prepare for NEET Easily:**

### **1. Prepare for NEET as per the syllabus and Guidelines**

**Before you prepare for NEET, you should gather complete information related to the syllabus. You can then compare the exam syllabus with the board syllabus and plan your study time accordingly. This would give you some extra hours to concentrate on your outline which is not covered in the board syllabus. However, do not waste your time on topics that are not included in the curriculum.**

### **2. Prepare a proper study Schedule**

**Students should have a good study schedule that is to be followed for the NEET Preparation. Plan your program in such a way that there are no extended hours of study. Include frequent intervals between study hours so that your mind is not blocked. Once you follow a schedule, it would make it easier to maintain your time and cover the entire syllabus.**

### **3. Prioritize and Work a bit extra on your weaker areas**

**As a candidate preparing for NEET, you should focus more on weak topics. Do not avoid the weaker areas as it might weaken your preparation. Try to prioritise the issues according to the importance and the level of your merit. The sooner you start preparing, the better it is, as it would give you ample time to revise the weaker topics and prepare.**

### **4. Evaluate your work**

**Your preparation is incomplete without proper evaluation. Always make it a point to evaluate your performance based on your training. Make sure to do it regularly. Take mock tests, solve old question papers, take tests with your friends, and follow tips of your seniors. In this way, it would be easier to cover almost all topics.**

## **5. Stay Healthy**

**When you are preparing for NEET, make sure you take good care of your health. Your study schedule would involve long hours and late nights, which can affect your health. Also, always aim to eat well, take frequent breaks, avoid junk food, exercise or walk, meditate for improved concentration.**

**With all these tips being followed with full dedication, preparation for NEET won't be difficult for the coming year. Wish you all the best!**
