## Strategies for Mitigating Computer Infrastructure Risk on the Gulf Coast

Make your business immune to hurricanes and other unplanned outages

**Server Rooms and Data Closets Should Not Look Like This**

Colocation and professional data center services are now affordable for small to medium size businesses. C2Axis has been monitoring pricing and network models for data center services outside of disaster zones for more than a decade. Take advantage of dropping colocation service and circuit pricing to implement fully protected and redundant data centers. for your business .

**Move your servers outside of Nola, Your business out of Risk**

The solution is easier than you would think. Most businesss located on the Gulf Coast have access to affordable fiber or high speed low latent connections. Pairing one of these high speed connections with the right data center can fully insulate your business from local service outages. Colocation is the only cost effective solution for small and medium businesses.
